## PERSONAL PROFILE

---

My research focuses on adolescent neurocognitive development and decision-making. I am especially interested in (real life) risk-taking behavior and social influence on risk-taking behavior. To answer my research questions I use a variety of techniques including fMRI, computational modeling, hormone assessments and laboratory tasks. I am highly motivated to disseminate my work to the general public. I regularly participate in outreach event such as public lectures, give interviews in newspapers and on television, and I am the author of a popular science book 'Het Riskante Brein'.

The PhD students make use of a variety of attributes that are on stage. Ten PhD students were trained how to translate scientific knowledge to children aged 6-10. The Hoe?Zo! Show was part of the 'Weekend van de Wetenschap' at Utrecht University, where it was performed four times and reached ~1000 children and their parents. The show was supported by a grant from the Public Engagement Seed Fund, Utrecht University. In collaboration with Dr. L.V. de Groot, Utrecht University, I developed the show, set up the training for the PhD students and organised the final performance.*
